Professional Summary

AI Data Evaluator with hands-on experience reviewing, testing, and scoring LLM-generated outputs across coding, debugging, reasoning, and agentic tasks. B.Tech graduate in Artificial Intelligence and Data Science with practical exposure to LLM evaluation pipelines, structured feedback frameworks, and quality benchmarking. Experienced in reviewing AI outputs for correctness, clarity, and technical accuracy, with a builder's understanding of AI-integrated systems. Interested in AI evaluation, training data, model quality, and applied software engineering roles supporting AI products.

Technical Skills

Languages: Java, Python, JavaScript
AI/LLM: LLM Evaluation, Prompt Engineering, OpenAI API, Claude API, RAG, Agent Workflows, Function Calling, Claude Code
Frameworks: Node.js, React, FastAPI, REST APIs
Tools: Git, GitHub, Postman, VS Code, Vercel, Netlify
Concepts: Data Structures, OOP, Code Review, Workflow Automation

LLM Evaluation & Model Training Experience

AI Model Evaluator (Freelance) — Handshake AI

- Evaluated and validated LLM-generated outputs on coding, debugging, and reasoning tasks against defined quality standards.
- Reviewed model responses for correctness, clarity, and technical accuracy while providing structured feedback and rationale.
- Worked on tasks involving debugging, scripting, automation, and file operations within agentic and command-line environments.
- Created evaluation prompts grounded in verified primary sources for accuracy-focused review tasks.

Projects

ARCH — AI Outbound Automation System

- Designed and developed an AI-powered outbound lead generation platform for automated prospect research and outreach.
- Built evaluation workflows to improve AI-generated messaging quality, relevance, and consistency.

RevScout AI — Revenue Intelligence Platform

- Built an AI revenue intelligence platform that monitors accounts for commercial buying signals and identifies high-priority prospects.
- Designed workflows around signals such as strategic hiring, funding events, executive changes, and technology shifts.
- Generates account-specific mission briefings and tailored outreach angles to help sales teams decide who to contact and why.

RevRecover AI — AI Revenue Recovery Platform

- Built an AI-powered platform for dental and medical practices to analyze denied claims and identify recoverable revenue.
- Implemented recovery probability scoring, root-cause analysis, next-action recommendations, and AI-assisted appeal drafting.
- Added patient-balance tracking and recovery workflows to help practices prioritize claims worth pursuing.

Idea Committer — AI Project Execution Platform

- Built an AI-powered execution platform that converts project ideas into structured day-by-day plans with one deliverable per day.
- Implemented proof-based task verification so users must show evidence of completed work before the next task is unlocked.
- Designed recovery workflows that rebuild remaining plans when users miss tasks instead of simply marking them incomplete.

Experience

Web Development Intern — Oasis Infobyte

- Built responsive web applications integrating APIs and optimized frontend performance.
- Implemented filtering, pagination, and reusable UI components.

Web Development Intern — CodTech IT Solutions Pvt. Ltd.

- Developed responsive web interfaces using HTML, CSS, JavaScript, and modern frontend practices.
- Applied UI/UX principles to improve usability and accessibility.

Education

B.Tech — Artificial Intelligence & Data Science **2021 – 2025**
St. Peter's Engineering College, Hyderabad

Certifications

- HackerRank — Java, CSS
- Microsoft Azure AI Fundamentals — Generative AI
- Microsoft Azure AI Fundamentals — Natural Language Processing
- IBM SkillsBuild — AI & Machine Learning Fundamentals
